HEART-CENTERED DESIGN

Holistic design is an opportunity to create tranquil, soulful homes incorporating abundant light, natural materials, and tailored solutions for visually stunning projects that speak to the heart. Our holistic approach blends every aspect of architectural and interior design in a harmonious way, reflecting the elements in life and nature that feel most right to each client. Using a foundation of biophilic and sustainable design philosophies, we collaborate with clients, exploring ways design can connect them with the natural world and each other in unexpected ways.

HOW CAN I HELP YOU?

Whether purchasing land for a new build or a home for renovation, Intuitive Dwellings offers you an opportunity to begin a holistic journey of well-being. Designing a healthy home can be a collaborative exploration where routines become artful rituals, where connections to nature become seamless, where sustainability becomes chic, and where a healthy lifestyle becomes easy, intentional, and luxurious.

Well-being means feeling right where you live....and how you live.

- Maximize natural light and beauty of the site
- Craft spa-like kitchens, baths, work, and wellness spaces
- Incorporate wellness inside and out, from the flow and use of rooms and outdoor spaces to materials and finish selections
- Enhance curb appeal and flow of spaces for existing properties
- Balance lifestyle and budget goals to optimize the overall success of the project
- Advise about the general costs of possible design solutions
- Offer turnkey design-build services, if desired
